Configuration.....	3
--------------------	---

Configuration

To configure the plugin , please
Navigate to System > Configuration
Then Recent Order Notification
section under Tech9logy tab.

The screenshot shows the Magento Admin Panel interface. At the top, there is a navigation bar with various tabs including Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Banner Slider, Exporter, Reports, System (highlighted), Trial User, Testimonials, Survey, Bofc, and Get help for this page. A search bar for 'Global Record Search' and a login status 'Logged in as control | Thursday, April 13, 2017 | Log Out' are also visible. Below the navigation bar, there is a 'Latest Message' section with a reminder to change default phone numbers and callouts before site launch, and a notification about 18 critical, 8 major, 26 minor, and 1772 unread messages. The main content area is titled 'Recent Order Notification' and includes a 'Save Config' button. The configuration is divided into 'General Setting' and 'Current Configuration Scope' (Default Config). The 'General Setting' section includes the following fields:
