Installation

Step – 1

Check Permission

Make sure the “app” directory of your Magento store and all directory inside /app/ have full written permission.

Important Note: Change all permission back after installation.

Step – 2

Disable Compilation

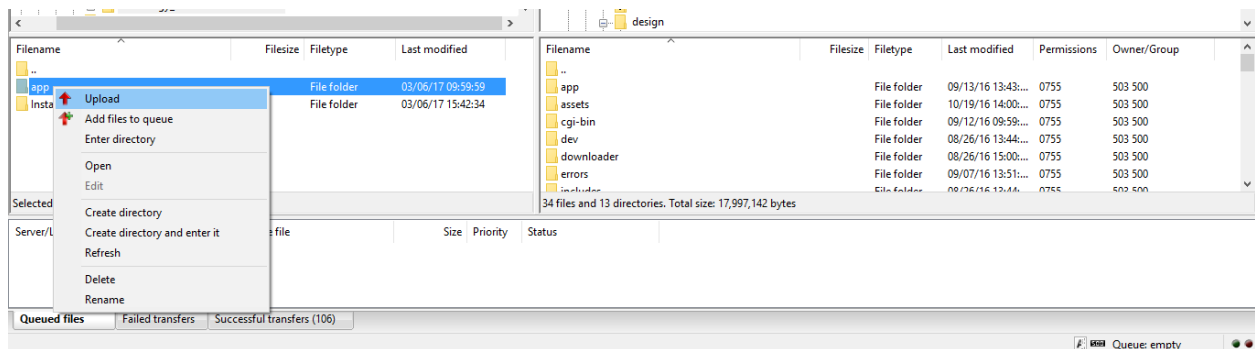

Log into Magento **admin panel** and go to **System → Tools → Compilation** and disable the compilation.

After **Step 6**, you can run the compilation process again if need.

Step – 3

Upload Files

Extract the downloaded Zip file and upload **app** folder from the extension package to the installation root directory of Magento.

Step – 4

Clear Cache

Clear all basic 5 types of cache in Magento, for this go to **System → Cache Management**

And flush all types of Magento cache.

Step – 5

Re-indexing

To re-index all the data, go to **System** → **Index Management** and then select all and click on submit button.

Step – 6

Re – Login

Log out and log back into **Magento Admin Panel**.

Step – 7

Use of Extension

Go to **System** → **Configuration** then in the left bar, you will get **Fanbook** section under **Fanbook** Tab.

The screenshot shows the Magento Admin Panel Configuration page for the Fanbook extension. The page is titled "Fanbook" and has a "Save Config" button in the top right corner. The left sidebar shows the navigation menu with "Fanbook" selected. The main content area displays the configuration options for the Fanbook extension:

- Enable: Yes (dropdown menu) [STORE VIEW]
- Use Breadcrumbs: Yes (dropdown menu) [STORE VIEW]
- Banner Image: Choose File No file chosen [STORE VIEW]
Allowed file types: jpeg, gif, png.

The page also includes a "Current Configuration Scope" dropdown set to "Default Config" and a "Manage Stores" link. The bottom of the page shows the Magento Admin Panel header with the "System" tab selected and a notification bar indicating 16 critical, 6 major, 15 minor, and 70 unread messages.
